

Love Rubbish.

Russian Hill Neighbors - Earth Day Cleanup

April 22, 2019

Rubbish Impact Report

Russian Hill Neighbors took to the streets and cleaned up the neighborhood on Earth Day, April 22, 2019. Volunteers used the rubbish app to tag litter. The results were great - see below!

	Number of Pieces	% of Total
Tobacco	194	24.6%
Plastic	193	24.5%
Food	9	1.1%
Glass	5	0.6%
Paper	335	42.5%
Other	52	6.6%

Rubbish Mapped Footprint

Time Logged: **63 min**

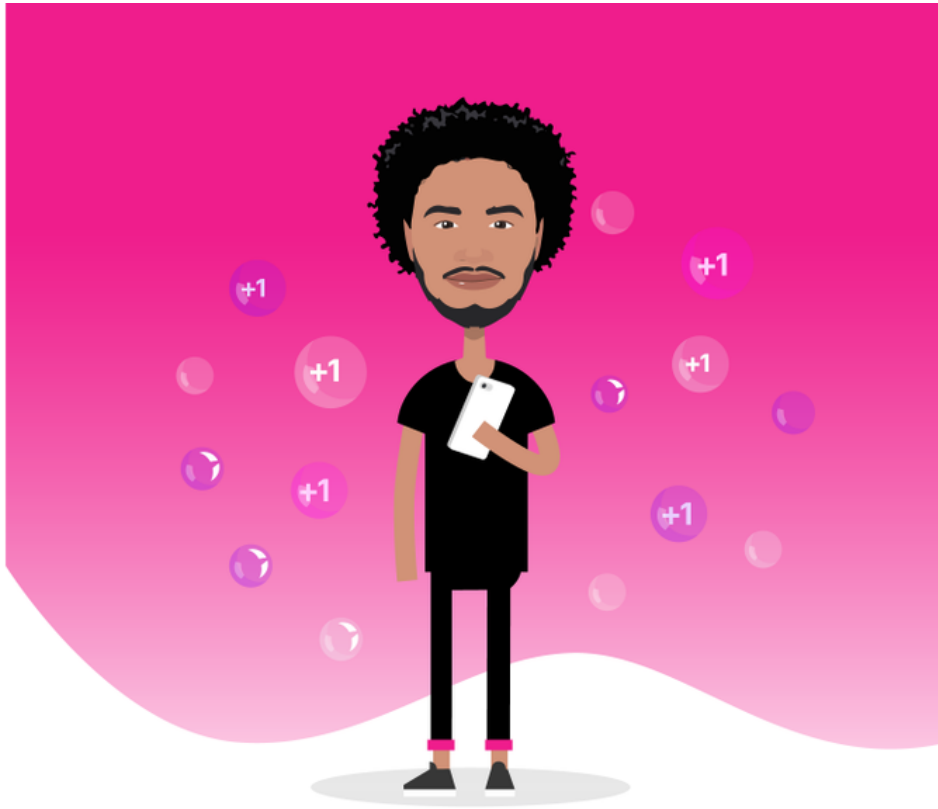

Total Pieces Cleaned: **788**

Pieces per Minute: **12.5**

Rubbish Data - Knowledge is Power

Great work collecting so much rubbish! Now, we use this information to improve the neighborhood.

- **The most littered block was Larkin Street between Broadway and Green.**

Is there something about those blocks that make them more litter prone. Are there gathering places, like benches, that may result in more litter? Keep an eye out!

- **Were there garbage cans?**

If you did not see one in the cleanup area, perhaps that could be a solution! You can use rubbish data to encourage the city to install one.

- **Do it again!**

We've found it helpful to clean the same area several times to develop a better understanding of the environment and implement sustainable solutions. Evaluate how your street changes!

**Let's keep improving,
one block at a time!**

**Clean streets have a real
impact on a community's
health, safety, and
economic potential.**
